DEPARTMENT	: BSC.IT(InformationTechnology)
SESSION	: 2020-2023
COLLEGE	: ST. XAVIER'S COLLEGE, RANCHI

TRAINING CONDUCTED AT

CCL

SYSTEM DEPARTMENT

St. XAVIER'S COLLEGE, RANCHI

JHARKHAND

DURATION: 4 WEEKS

Acknowledgement

In the accomplishment of completion of my project on Website designing, I would like to convey my special gratitude to

Mr. Rayees Ahmad Naik of system department and as well as our teachers of St.Xavier's college for allowing us the opportunity to do this project.

Your valuable guidance and suggestions helped me in various phases of the completion of this project. I will always be thankful to you in this regard.

I am ensuring that this project was finished by me and not copied.

DECLARATION

I hereby declare that the project work titled "College website designing at CCL " is genuine research work undertaken by me under the guidance of Mr. Rayees Ahmed Naik. The report is being submitted in partial fulfilment of BACHELOR OF SCIENCE (HONOURS IN INFORMATION TECHNOLOGY) from St. Xavier's college, Ranchi.

Amarjeet

CERTIFICATE

This is to certify that the project on COLLEGE WEBSITE of St. Xavier's College, Ranchi has been submitted by ASHISH KUMAR GUPTA, ROLL No. 20VBIT044543 from ST.XAVIER'S COLLAGE, RANCHI. Training period was from 13.03.2023 to 11.04.2023.

RAYEES AHMAD NAIK
MANAGER (SYSTEM)

ABOUT THE COMPANY

CENTRAL COALFIELDS LIMITED

Central coalfields limited is a category-1 mini rattan company since October 2007. Formed on 1st November 1975, CCL (formally national coal development corporation limited) was one of the five subsidiaries of Coal India Ltd. which was the first holding company for coal in the country (CIL now has 8 subsidiaries).

CCL has a proud past. As NCDC, it heralded the beginning of nationalization of coal mines in India. NCDC was set up in October 1956 as government owned company in pursuance of the industrial policy resolution of 1948 and 1956 of the government of India. It was started with nucleus of 11 old state collieries (owned by the railways) having a total annual production of 2.9 million tons of coal.

Project area under CCL

- Barka –Sayal
- Argada
- North Karanpura
- Rajhara
- Rajrappa
- Piparwar
- Kathara
- Kuju
- Hazaribagh
- Bokaro & Kargali
- Dhor
- Magadh Amrapali
- Mines rescue station

1. Introduction

Payroll system is the heart of any Human Resource System of an organization. The solution has to take care of the calculation of salary as per rules of the company, income tax calculation and various deductions to be done from the salary including statutory deductions like Income tax and provident fund deductions. It has to generate pay-slip, cheque summary and MIS reports.

It is understood that we are tired of managing thousand of odd papers, pay slips, payroll reports, and salary details and so on. Imagine that we have a payroll processing system which will generate our pay slips and payroll reports within seconds. We can help others automated your payroll system by developing a customized payroll application that suits your specific requirements.

1.1 Purpose

Main aim of developing Payroll Management System is to provide an easy way not only to automate all functionalities involved managing leaves and Payroll for the employees of Company, but also to provide full functional reports to management of Company with the details about usage of leave facility.

We are committed to bring the best way of management in the various forms of PMS. We understand that PMS is not a product to be sold, it is a tool to manage the inner operation of Company related to employee leave and Payroll.

1.2 Scope

This Application works in Multiple PC's installed on multiple Computers but sharing same database by which users of different department can use it sitting at different locations simultaneously.

But in future we can make the Application where the database will be hosted in order to manage the all departments which will be located in different places and by keeping domain of Application as Online.

1.3 Benefits

- To improve the efficiency.
- Quickly find out information of an employee details.
- To provide easy and faster access information.
- To provide user friendly environment.

1.4 Definitions, Acronyms, Abbreviations

- NetBeans IDE 6.5.1 (.java) is an object-oriented computer programming language that can be viewed as an evolution of the classic programming languages.
- Microsoft SQL Server is a relational model database server produced by Microsoft.
- SRS - Software Requirements Specification.
- PMS - Payroll Management System

1.5 Project Overview

The following subsections provide the complete overview of the software specifications requirements documentation for the product Payroll Management System. The entire SRS is documented in view of User and the following sub sections are arranged to give a complete outlook of the software, its perspective, features, system requirements and users know how it is.

2. Overall description

2.1 Product perspective

This software is developed specifically to cater the company employees leave management, is totally self contained and works efficiently. It provides simple database rather than complex ones for high requirements and it provides good and easy graphical user interface to both new as well as experienced user of the computer.

CONCLUSION

The Payroll Management System can prove to be a very useful tool. An employee doesn't have to visit payment office or payment office also does not require sending a pay/income slip to employee about his/her payment details. The process is very fast and manual labor is eliminated. It also saves paper as well as money. And, hence it is great help to employees to know about their payments and tax and respond according to it.

- SRS - Software Requirements Specification.
- PMS - Payroll Management System

1.5 Project Overview

The following subsections provide the complete overview of the software specifications requirements documentation for the product Payroll Management System. The entire SRS is documented in view of User and the following sub sections are arranged to give a complete outlook of the software, its perspective, features, system requirements and users know how it is.

2. Overall description

2.1 Product perspective

This software is developed specifically to cater the company employees leave management, is totally self contained and works efficiently. It provides simple database rather than complex ones for high requirements and it provides good and easy graphical user interface to both new as well as experienced user of the computer.

2.2 Product functions

2.2.1 Master module

- Employee Name
- Address
- County
- Post Code

2.2.2 Employee module

- Employee Name
- Employer Name
- Reference No.

2.2.3 Pay date module

2.2.4 Tax module

- Tax Period
- Tax Code
- NI Payment
- NI Code
- Taxable Pay
- Pensionable Pay

2.2.5 Salary module

- Inner City Weighting
- Basic Salary
- Over Time

2.2.6 Recommendation module

2.3 User Characteristics

2.3.1 End Users

- No specific knowledge or skills are required from the end user.
- End user should have basic idea about computer operations and database.

2.3.2 Administrator

- Administrator must be having good knowledge of database management system.
- Administrator must be capable to manage user rights.
- If the network connection does not work properly than our system should not work as intended.
- Also it is assumed that the product is installed properly at web server.
- This system will not take care of any virus problem, which might occur either on the client or the server system. Avoiding the use of pirated software and ensuring that floppies and other removable media are scanned for viruses before use could minimize the possibility of viral infection.
- Recovery of data after a system crash will be possible only if backups are taken at regular intervals.
- Manual interfaces cannot be fully avoided. Documented proofs like data entry of employees etc. will have to be verified by the concerned management staff before entering it into the computerized system.

2.4 Assumptions and Dependencies

Assumptions:

- The code should be free with compilation errors/syntax errors.
- The product must have an interface which is simple enough to understand.

Dependencies:

- All necessary hardware and software are available for implementing and use of the tool.

- The proposed system would be designed, developed and implemented based on the software requirements specifications document.
- End users should have basic knowledge of computer and we also assure that the users will be given software training documentation and reference material.
- The system is not required to save generated reports.

3. Specific requirements

3.1 External interface requirements

3.1.1 User interfaces

The software provides good graphical interface for the front end which is self explanatory.

FOR DEVELOPERS

Software Requirements:

- NetBeans IDE 6.5.1
- Java Server Pages
- Apache Tomcat 7.0.22.0
- Database –Oracle 10g
- Web Browser: Mozilla Firefox.
- Operating System – Windows XP and later.

Hardware Requirements:

- Processor: Pentium IV or above.
- Hard Disk – Minimum 2 GB of free space is required.
- RAM – Minimum 512 MB RAM.
- Internet Connection.

3.5.2 Reusability: Anybody can use and enhanced the software further.

3.5.3 Reliability: software is reliable as periodic backup of the database is maintained. So if any failure occurs, data can be recovered.

3.5.4 Maintainability: This software is maintainable as errors can easily be corrected and new functions can easily be added.

3.5.5 Compatibility: This software consumes very small amount of system-resources and is compatible wide range of devices like laptops, tablets that run windows.

4. Coding (Payroll.java)

4.1 New payment

```
private void jButton2ActionPerformed(java.awt.event.ActionEvent evt) {  
    jtxtEmployeesName.setText(null);  
    jtxtPostCode.setText(null);  
    jtxtCounty.setText(null);  
    jtxtAddress.setText(null);  
  
    jlblNIPayment.setText(null);  
    jlblStudentLoan.setText(null);  
    jlblPension.setText(null);  
    jlblTax.setText(null);  
}
```

```

jlblPensionablePay.setText(null);
jlblTaxablePay.setText(null);
jtxtNIPayment.setText(null);
jtxtRecom.setText(null);

jlblNetPay.setText(null);
jlblDeductions.setText(null);
jlblGross.setText(null);

jtxtOverTime.setText(null);
jtxtBasic_Salary.setText(null);
jtxtInner_City.setText(null);

jtxtEmployeeName.setText(null);
jtxtEmployerName.setText(null);
jtxtRef_No.setText(null);
}

```

4.2 Add Wages

```

private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {
    double A00, A30, B40, C50, D60, E70, F80, G90, PensionablePay, TaxablePay;
    double deduction, Pension, StudentLoad, NIPayment, TotalDeduction, NetPay;

    InnerCity = Double.parseDouble(jtxtInner_City.getText());
    BasicWage = Double.parseDouble(jtxtBasic_Salary.getText());
    OverTime = Double.parseDouble(jtxtOverTime.getText());
}

```

```
Gross = InnerCity + BasicWage + OverTime;  
String GrossPay = String.format("%.2f",Gross);  
jlblGross.setText(GrossPay);
```

```
try{
```

```
    if(jcboNICode.getSelectedItem().equals("A0000")){
```

```
        A00 = (Gross * 9)/ 100;
```

```
        deduction = Gross - A00;
```

```
        Pension = (deduction * 12)/100;
```

```
        StudentLoad = Pension + A00;
```

```
        StudentLoad = Gross - StudentLoad;
```

```
        StudentLoad = (StudentLoad * 5.7)/100;
```

```
        NIPayment = StudentLoad + Pension + A00;
```

```
        NIPayment = Gross - NIPayment;
```

```
        NIPayment = (NIPayment * 4.2 )/100;
```

```
        String TaxPaid = String.format("%.2f",A00);
```

```
        jlblTax.setText(TaxPaid);
```

```
        jlblTax.setText("Rs" + TaxPaid);
```

```
        String PensionPaid = String.format("%.2f",Pension);
```

```
        jlblPension.setText(PensionPaid);
```

```
        jlblPension.setText("Rs" + PensionPaid);
```

```
        String StudentLoanPaid = String.format("%.2f",StudentLoad);
```
